HYDRAULIC RODS & TUBES

We plate new manufactured hydraulic rods and tubes, and we also recondition used hydraulic components. We handle both high volume smaller hydraulic components and parts up to 50 feet long and up to 30 tons in weight.

Benefits of treatment:

- Greatly extended wear protection
- Corrosion resistance

Related services for hydraulic rods & tubes:

- Weld repair
- Honing
- Grinding
- Polishing
- *Seal Plus* process applied on finished rod surfaces virtually eliminates potential corrosion attack to hydraulic surfaces
