Acid Tin Plating

Environmentally-Friendly Process

Empire's proprietary acid tin plating process has shown superior salt-spray results in industry tests. Process bath high purity level is maintained via pre-plate extensive cleaning methods and use of anode bags.

Advantages:

- Corrosion protection on non-wear items
- Room temperature process
- Bright finish
- Withstands high operating and use temperatures
- Offers excellent adhesion to the treated base metal
- Environmentally-friendly

Applications:

- Food processing
- Marine
